HUMAN–COMPUTER INTERACTION
A Journal of Theoretical, Empirical, and Methodological Issues of User Science and of System Design

Contents of Volume 14

Numbers 1 & 2

Introduction to This Special Issue on Representations in Interactive Systems Development 1
Peter Johnson, Eamonn O'Neill, and Hilary Johnson

Coherence: An Approach to Representing Ethnographic Analyses in Systems Design 9
Stephen Viller and Ian Sommerville

Representations and User–Developer Interaction in Cooperative Analysis and Design 43
Eamonn O'Neill, Peter Johnson, and Hilary Johnson

Representing Cognitive Activity in Complex Tasks 93
Philip J. Barnard and Jon May

Metaphors and Models: Conceptual Foundations of Representations in Interactive Systems Development 159
David Benyon and Manuel Imaz

The Untrained Eye: How Languages for Software Specification Support Understanding in Untrained Users 191
Carol Britton and Sara Jones

Number 3

Timetrees: A Branching-Time Structure for Modeling Activity and State in Human–Computer Interaction 245
Jeff Brandenburg and H. Rex Hartson

Cooperative Work and Shared Visual Context: An Empirical Study of Comprehension Problems in Side-by-Side and Remote Help Dialogues 283
Laurent Karsenty

User Interface Affordances in a Planning Representation 317
Robert St. Amant

Training Conditions and Strategic Aspects of Skill Transfer in a Simulated Process Control Task 355
Tom Kontogiannis and Andrew Shepherd

Effects of Humor in Task-Oriented Human–Computer Interaction and Computer-Mediated Communication: A Direct Test of SRCT Theory 395
John Morkes, Hadyn K. Kernal, and Clifford Nass

Acknowledgment to Reviewers 437
